

70 Years of Service

SINCE 1881 this Company has steadily gained in world-wide reputation for the production of Lighting Fittings of sound workmanship and design.

During this period a great transition has occurred in the Illuminating Industry, the growth of which has brought a corresponding development in the design and manufacture of equipment for Domestic Lighting, Theatres, Cinemas, Ships, Schools, and Public Buildings of all descriptions, in which fields we are specialists.

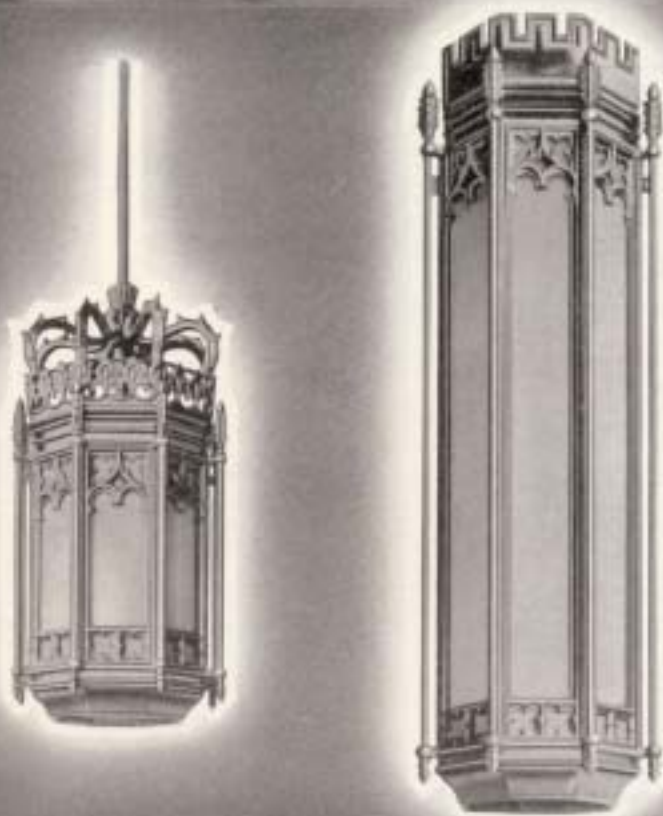

We feel sure that the comprehensive range of Lighting Fittings and Glassware illustrated in this catalogue will prove to be of great interest not only to the domestic user, but also to those concerned in the planning and execution of lighting schemes.

Our Technical Department is at your service to collaborate in the preparation of Lighting Schemes, and to submit quotations to Architects and Consultants' designs and specification.

You are cordially invited to visit our well-equipped showrooms at 20/22, Mount Street, Park Lane, London, W.1, where a very wide range of lighting fittings is displayed under the best possible conditions.

Unfortunately, at the time of the publication of this catalogue, certain Government restrictions are in force in connection with the use of copper, zinc, nickel and their alloys. A number of fittings in this Catalogue are described as being made of these materials, and it may only be possible for us to supply so long as stocks last. For some designs, alternative materials are being adopted, in others, where such action would seriously affect the performance, the designs will be temporarily withdrawn.

The Palace of Westminster

Two examples of real bronze lighting fittings manufactured by Falks for the new House of Commons.
Architect, Sir Giles Gilbert Scott, O.M., R.A. Consulting Engineers, Oscar Faber & Partners
